

Simplify Your Waxing Routine with the Swix T60-110 Wax Machine

Would you like to spend less time waxing and more time skiing?

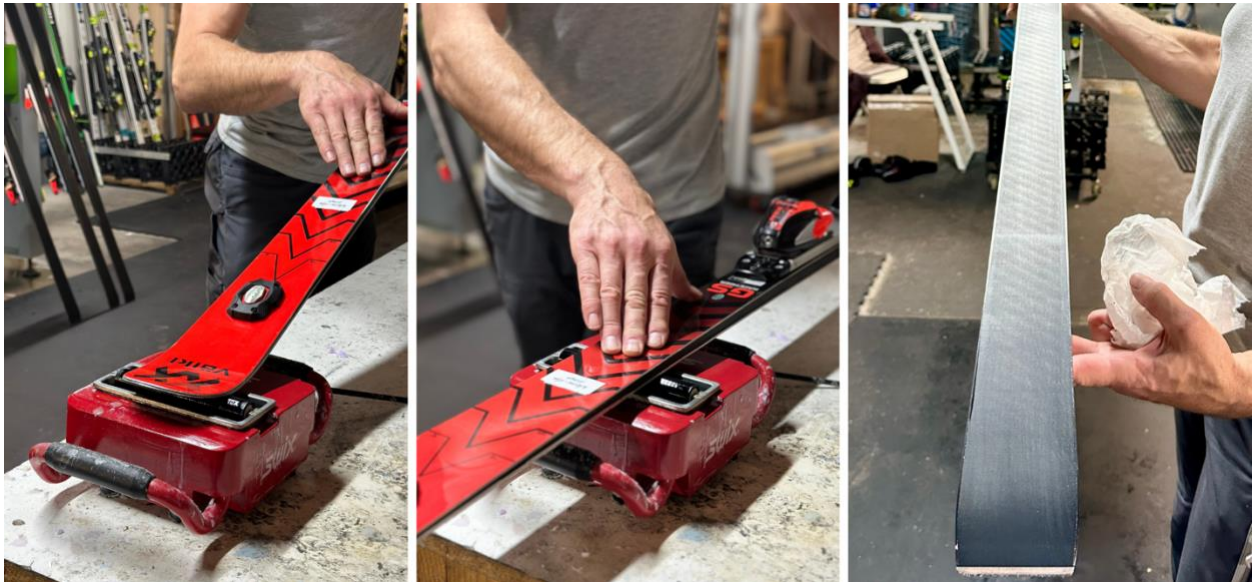

As a racer or avid skier, you know the importance of a perfectly waxed ski. But let's face it, traditional waxing with an iron can be time-consuming, messy, and sometimes inconsistent.

Introducing the Swix T60-110 Wax Machine: Your New Waxing Secret Weapon

The Swix T60-110 Wax Machine is designed to streamline your waxing process so you can spend less time with preparations off the hill and more time focusing on performance.

Here's why you'll love it:

- **Effortless Application:** Simply turn on the machine and once it heats up, roll your ski over the heated wax roller for a consistent, even coat.
- **Quicker Waxing:** Make one or two passes with the ski and you are done!
- **Cleaner Waxing:** No more messy wax drips, no more big piles of scraped off wax.
- **More Efficient Consumable Use:** With 60% or more reduction in wax use, and little to no scraping, you'll use less wax and leave less money on the wax room floor.
- **Easier cleanup:** When you're done waxing simply put the lid on the wax pot after it has cooled and put the machine away. This also keeps your wax nice and clean. Additional wax pots available (sold separately) for all your waxes.
- **Superior Performance:** Achieve optimal ski performance with precise wax application.

Experience the Difference:

Imagine the convenience of a perfectly waxed ski in minutes, without the hassle of maintaining proper iron temperature, dribbling the wax bar down the ski, then patiently ironing the wax in, while carefully

monitoring temperature and speed so as not to overheat the ski bases. Plus, no more chances of scratching your ski base with a piece of microscopic dirt or debris you somehow did not see on the base of your iron. The Swix T60-110 Wax Machine is the key to spending less time in the tuning room so you can maximize your full potential on the slopes.
